# Jalankan server local : localhost/phpMyAdmin/

The screenshot shows the phpMyAdmin web interface in a browser window. The address bar displays `localhost/phpmyadmin/index.php`. The interface includes a sidebar with a tree view of databases: `information_schema`, `mysql`, `performance_schema`, `phpmyadmin`, `prestashop_db`, and `test`. The main content area is titled "Server: 127.0.0.1" and contains several panels:

- General settings:** Includes a dropdown for "Server connection collation" set to `utf8mb4_unicode_ci`.
- Appearance settings:** Includes a dropdown for "Language" set to "English", a dropdown for "Theme" set to "pmahomme", and a "Font size" dropdown set to "82%". A link for "More settings" is also present.
- Database server:** Lists server details:
  - Server: 127.0.0.1 via TCP/IP
  - Server type: MariaDB
  - Server version: 10.1.21-MariaDB - mariadb.org binary distribution
  - Protocol version: 10
  - User: root@localhost
  - Server charset: UTF-8 Unicode (utf8)
- Web server:** Lists web server details:
  - Apache/2.4.25 (Win32) OpenSSL/1.0.2j PHP/5.6.30
  - Database client version: libmysql - mysqlnd 5.0.11-dev - 20120503 - \$Id: 76b08b24596e12d4553bd41fc93cccd5bac2fe7a \$
  - PHP extension: mysqli, curl, mbstring
  - PHP version: 5.6.30
- phpMyAdmin:** Lists version information and links:
  - Version information: 4.6.5.2
  - Documentation
  - Official Homepage
  - Contribute
  - Get support
  - List of changes
  - License

The browser's address bar shows the full URL: `localhost/phpmyadmin/server_databases.php?db=&token=7a01c18585e24ffeea2b121993811c0d`. The Windows taskbar at the bottom shows the system clock as 7:34 PM on 4/3/2017.

Buatlah data base di phpmyAdmin dengan nama yang mudah diingat dengan nama olshopnya.

The screenshot shows the phpMyAdmin web interface in a browser window. The address bar indicates the URL is `localhost/phpmyadmin/server_databases.php?server=1&token=cb5c82fa4d5cb3f1ac5124afdfd18e0d`. The page title is "Databases".

On the left sidebar, there is a "Recent" and "Favorites" section. Below it, a tree view shows the following databases:

- New
- information\_schema
- mysql
- performance\_schema
- phpmyadmin
- test

The main content area shows the "Databases" page. At the top, there is a "Create database" form with the following fields:

- Database name: `prestashop_db`
- Collation: (dropdown menu)
- Create button

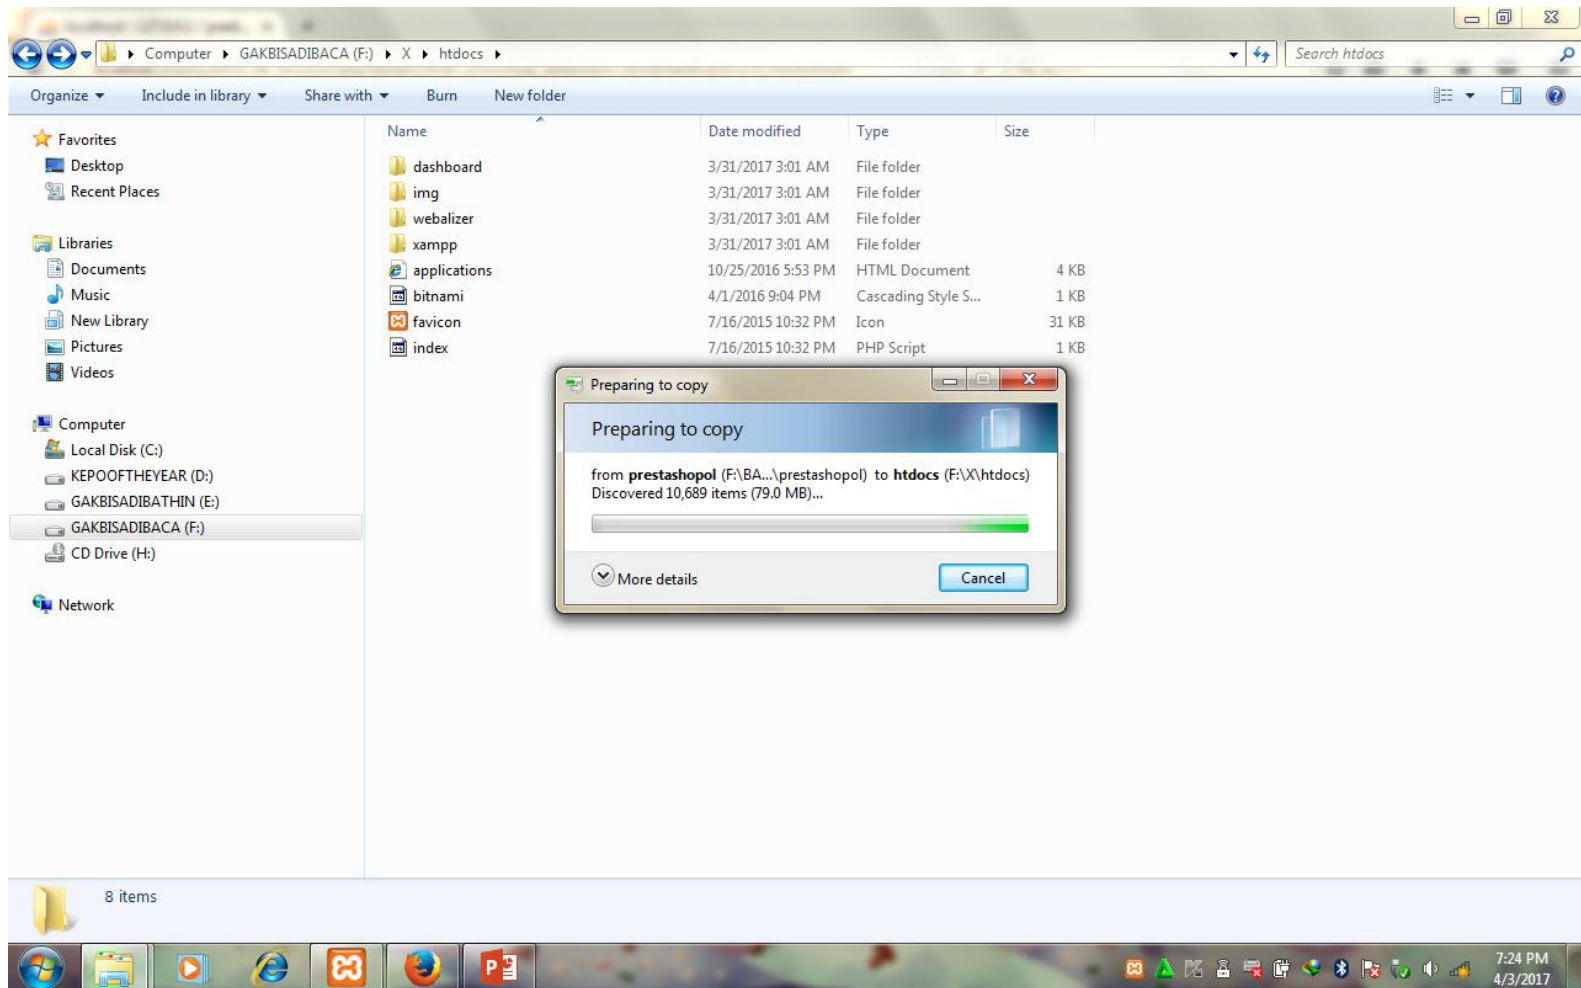

Below the form is a table listing the existing databases:

| Database                                    | Collation         | Action                           |
|---|-------------------|----------------------------------|
| <input type="checkbox"/> information_schema | utf8_general_ci   | <a href="#">Check privileges</a> |
| <input type="checkbox"/> mysql              | latin1_swedish_ci | <a href="#">Check privileges</a> |
| <input type="checkbox"/> performance_schema | utf8_general_ci   | <a href="#">Check privileges</a> |
| <input type="checkbox"/> phpmyadmin         | utf8_bin          | <a href="#">Check privileges</a> |
| <input checked="" type="checkbox"/> test    | latin1_swedish_ci | <a href="#">Check privileges</a> |
| Total: 5                                    |                   | latin1_swedish_ci                |

Below the table, there are checkboxes for "Check all" and "With selected:" followed by a "Drop" button.

A note at the bottom of the page states: "Note: Enabling the database statistics here might cause heavy traffic between the web server and the MySQL server." Below this note is a checkbox labeled "Enable statistics".

Copy file prestashop yang sudah di ekstrak ke folder : htdocs didalam XAMPP

# Instal File Prestashop

- Instal file prestashop yang sudah di ekstrak melalui <http://localhost/prestashop/>

## SYSTEM AND PERMISSIONS

**Required set-up. Please verify the following checklist items are true.**

If you have any questions, please visit our [Documentation Wiki](#) and/or [Community Forum](#).

**Your configuration is valid, click next to continue!**

### PHP settings (modify via your PHP admin software):

- ✓ PHP 5.0 or later installed
- ✓ Allowed to upload files
- ✓ Allowed to create new files and folders
- ✓ GD Library is installed
- ✓ MySQL support is on

### Write permissions on files and folders:

- ✓ /config
- ✓ /tools/smarty/compile
- ✓ /tools/smarty/cache
- ✓ /tools/smarty\_v2/compile
- ✓ /tools/smarty\_v2/cache
- ✓ /sitemap.xml

### Write permissions on folders and subfolders/recursively:

- ✓ /img
- ✓ /mails
- ✓ /modules
- ✓ /themes/prestashop/lang
- ✓ /themes/prestashop/cache
- ✓ /translations
- ✓ /upload
- ✓ /download

## DATABASE CONFIGURATION

Configure your database by filling out the following fields:

**You have to create a database, help available in  
readme\_en.txt**

Database server  
name: localhost

Database name: prestashop\_db

Login: root

Password:

Database Engine: InnoDB

Verify now!

✓ Database is connected.

PrestaShop database tables prefix: ps\_

## INSTALLATION TYPE

- ☐ Simple mode: Basic installation (**FREE**)
- ☒ Full mode: includes **100+ additional modules** and demo products (**FREE too!**)

## E-MAIL DELIVERY SET-UP

☐ Configure SMTP manually (advanced users only)

By default, the PHP 'mail()' function is used. For more functionality, manual SMTP configuration is recommended.

enter@your.email

Send me a test e-mail

# Menambahkan pilihan bahasa Indonesia , Mata Uang, Negara etc.

- Localization -> language -> Add new Language

The screenshot shows the PrestaShop 1.6.1.12 Localization configuration page. The browser address bar shows the URL: `localhost/prestashop/admin_toko/index.php?controller=AdminLocalization&token=28c50931027d4cb2aa9e6c32828667a1`. The page header includes the user name 'Khoiriyah Latifa', 'My shop', and a link to 'Connect to PrestaShop Marketplace account'. The main navigation bar shows 'Quick Access' and 'Vha Gallery'. The left sidebar contains links for 'Help' and 'Recommended Modules and Services'. The right sidebar contains a search bar and a list of modules: 'Dashboard', 'Catalog', 'Orders', 'Customers', 'Price Rules', 'Modules and Services', 'Shipping', 'Localization' (highlighted), 'Preferences', 'Advanced Parameters', 'Administration', and 'Stats'. The main content area is titled 'Localization' and contains a 'CONFIGURATION' section. This section has four rows of settings: 1. 'Default language' with a dropdown menu set to 'Indonesia' and a 'Default language' label. 2. 'Set language from browser' with 'NO' and 'YES' buttons, where 'YES' is selected, and a label 'Set browser language as default language'. 3. 'Default country' with a dropdown menu set to 'Indonesia' and a 'Default country' label. 4. 'Set default country from browser language' with 'NO' and 'YES' buttons, where 'YES' is selected, and a label 'Set country corresponding to browser language'. Below these are two more rows: 5. 'Default currency' with a dropdown menu set to 'Rupiah' and a 'Default currency' label. 6. 'Time zone' with a dropdown menu set to 'Asia/Jakarta' and a 'Time zone' label. A yellow warning banner at the top of the configuration area states 'Cannot connect to http://api.prestashop.com'.

# Mengatur / Mengganti Tampilan PrestaShop

- Pilih Menu Module and Services

# Menyiapkan Hosting dan Domain

- Gunakan hosting gratis
- [www.webfreehosting.net](http://www.webfreehosting.net)
- Sign up for free web hosting
- Submit
- Aktivasi

# Mendapatkan domain dari hostinger

- Buka hostinger
- Create account
- Isi form
- Sign in
- Klik getting new domain
- Isikan nama domain anda misalnya murahnyaman.tk
- Klik set up
- Klik name server

- Ketikkan nama server
- Name server1 : ns1.webfreehosting.net
- Name server2 : webfreehosting.net
- Klik : set up
- Cek di : Addon Domain di cpanel
- Klik ok

# Membuka cpanel

- Buka control panel :  
<http://cpanel.webfreehosting.net>
- Masukkan username dan password yang sudah diberikan oleh webfreehosting.
- Klik Addon domain
- Masukkan domain yang tadi dibuat di hostinger
- misalnya : murahnyaman.tk

# Membuat Database di Cpanel

- Membuka Cpanel Webfreehosting
- Klik MySQL database
- Create new database
- Ketikkan nama database untuk prestashop
- Klik Create Database
- Masukkan nama databse yang sudah anda buat

# Menginstall prestashop pada serverhosting

- Buka filezilla masukkan host, username, password (yang sudah diberikan webfreehosting username dan password untuk FTP)
- klik tombol quickconnect
- Tunggu sampai download selesai
- Buka folder htdocs , klik kanan pilih Upload
- Pilih file prestashop dalam folder penyimpanan anda : misalnya D: prestashop ( dr xampp htdocs)
- Buka browser : <http://murahnyaman.tk>

- System and permission klik agree
- Konfigurasi sesuaikan dari data hosting
- Klik verify now
- Masukkan alamat email
